

Demo TouchVue

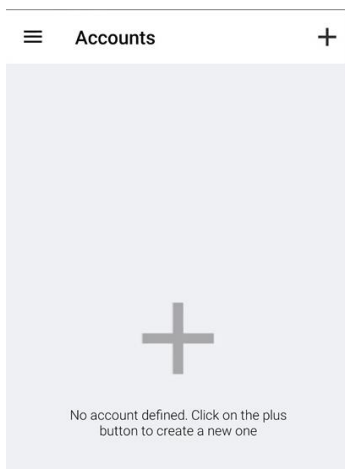

TouchVue is an app notifying mobile users of any event on the process and providing an interface to react in a timely fashion. It relies on the latest technologies offering a cost-effective solution combining ergonomics, security and ease of implementation.

✓ A server for demonstration is available

1- Open TouchVue

2- Add a server

← Server configuration DONE

SETTINGS

Alias Demo

Host address jemo.pcvuesolutions.com

Port 443

SECURITY

Ignore certificate errors

3- Connect

← Demo EDIT

TouchVue

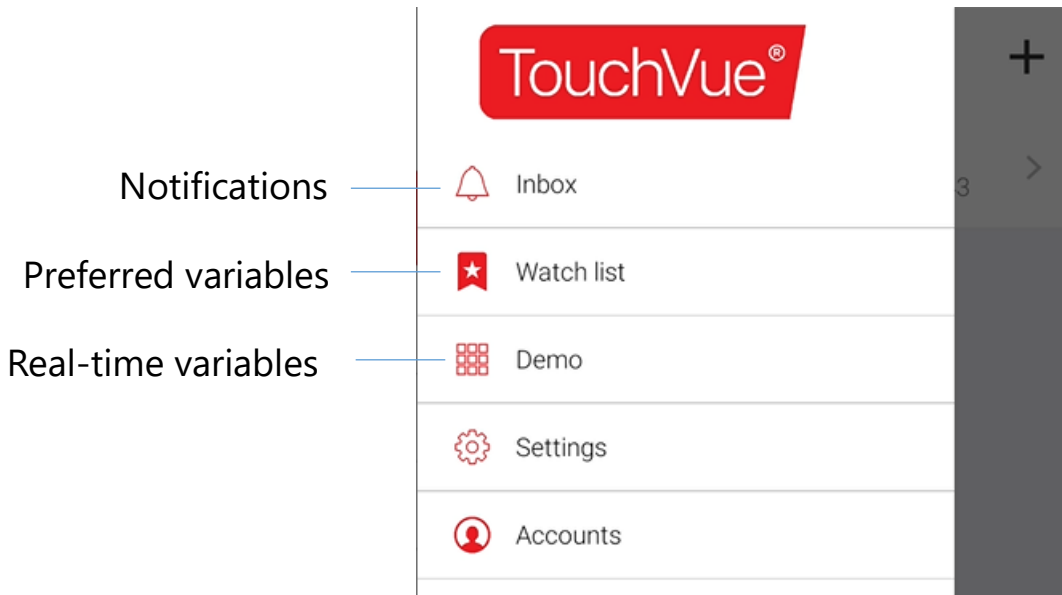

maint_en

.....

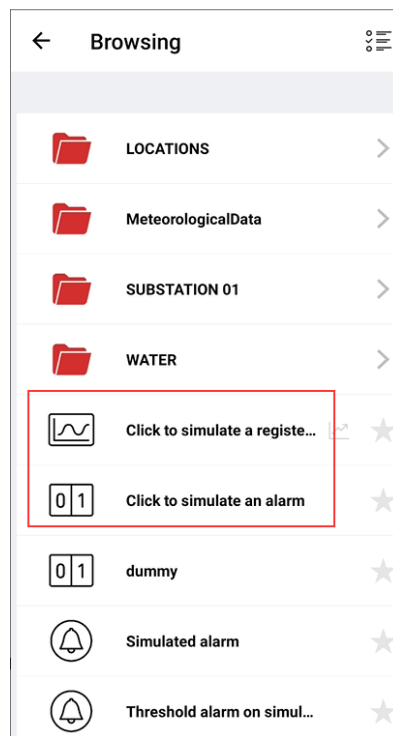

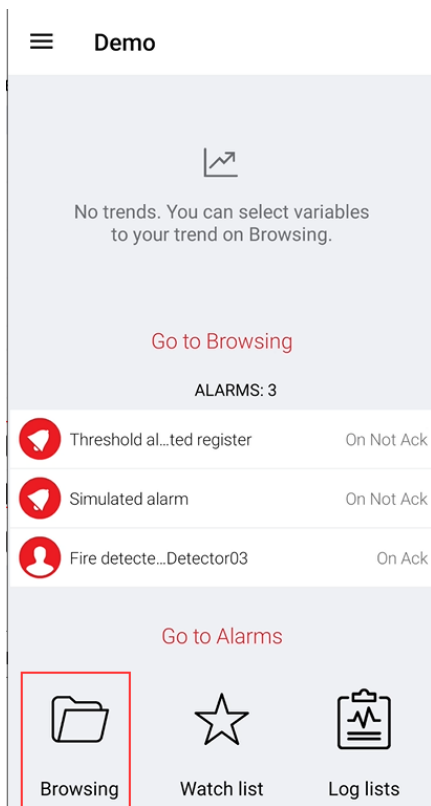

Log in

User/Pwd
Maint_en/Maint_en

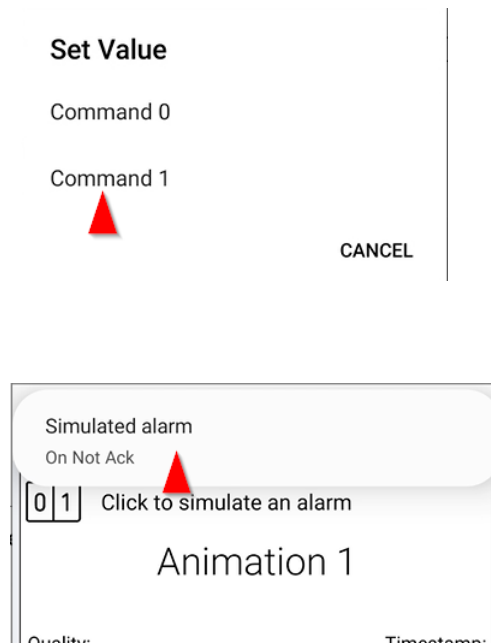

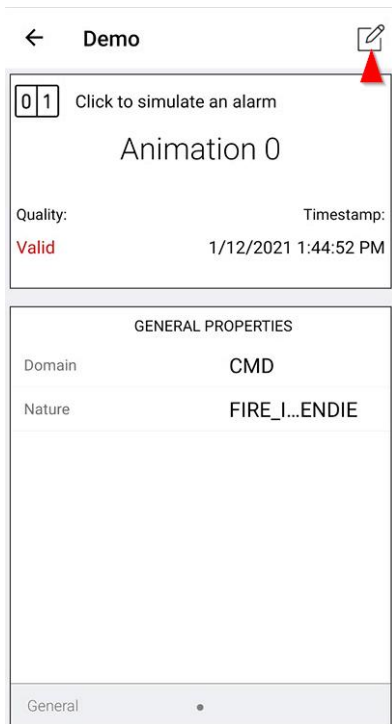

4- Test

Tap on Demo

Tap on the simulation variables

Enter a value >25 to trigger a threshold
